

Quality, Safety, Health and Environmental (QSHE) Policy Statement

The board, management and staff of Associated Battery Manufacturers EA Ltd, are committed to maintaining and enhancing the reputation of ABM as an industry leader in Battery and associated components manufacture.

To achieve this, we will;

Compliance and Protection

Ensure compliance to international standards in automotive sector i.e. ISO 9001, ISO 14001 as well as applicable statutory, regulatory and any other requirement that ABM subscribes which relate to its Quality, Safety, Health and Environmental aspects and impacts.

Ensure environmental protection through recycling of all used lead acid battery components and related operational wastes at Athi river plant. Minimizing and controlling waste by reduction of emissions, effluents, factory scrap and solid discharges.

Customer and Interested Parties Satisfaction

Deliver added value to our clients and Interested Parties by identifying, monitoring and responding to their needs, exceptions and level of satisfaction;

Continually embrace the innovation, technological advancement and new ideas in product, environmental and safety improvements.

Continual improvement

Set measurable objectives and seek to continually improve the product quality, environmental protection, delivery of products and services;

Engage all staff in continual improvement and recognize their contributions;

Continually review and improve the effectiveness of our Integrated Management System (IMS);

Periodically review and modify the QSHE policy to maintain the relevance to what ABM subscribes to.

Communication

Openly communicate this QSHE policy to all stake holders.

Advise, educate and encourage all interested parties to adopt and promote safe, healthy and environmentally sound practices.

Avail the policy to interested parties as appropriate.

GUY JACK

GROUP MANAGING DIRECTOR
